A Complete Index to
MATERIALS AND METHODS
(FORMERLY METALS AND ALLOYS)

Volumes 21 and 22

January-December 1945, inclusive

This is a complete index of the contents of MATERIALS ND METHODS for volumes 21 and 22—the January December 1945 issues, inclusive. It covers not only e feature articles and the digests, but all the depart- ents (Production Frontiers, Editorials, Shop Notes, ews, Books, and Blueprints) as well. All items are in- exed not only under their titles or specific subjects, ut are also grouped and indexed under the major broad ubdivisions of the magazine's field.

The department in which the item appears is indi- ated in each entry by words as "(digest)," "(news)," tc., following the subject or author. Where a department is not thus indicated, the indexed item was a feature article. The reference numeration indicates, first, the page number, which is continuous throughout each volume; second, the volume number; and third, the issue number showing the month in which the item appeared. Thus, the reference number 1363:21-5 indicates that the indexed article is to be found on page 1363 of volume 21 (Jan.-June 1945) in the May issue, and the reference 1432:22-5 indicates the article is on page 1432 of volume 22 (July-Dec. 1945) in the November issue.

—The Editors.

SUBJECT AND TITLE INDEX

- brasion-resistant metals, Wlinker (digest)—194:21-1
- brasives:
  - Coated, metal removal with, Halstead (digest)—1194:22-4
  - Polishing, size characteristics, Power (digest)—514:21-2
- cid hood and cape (news)—1462:21-5
- dhesives:
  - Rose (file facts)—1785: 22-6
  - Rubber cement for bonding metals (news)—1148:21-4
  - Water-resistant, for export containers (news)—1134:21-4
- gricultural machinery (blueprints)——1224:21-4
- ir conditioning, protecting bearings with, Martinez (shop notes)—1675:21-6
- ir gaging system (news)—225:22-1
- ir pressure clamps for stretching, Bucklew (shop notes)—460:22-2
- **IRCRAFT AND ENGINES:**
  - Cowl fabrication, evolution of, Arnold (shop notes)—154:21-1
  - Crankshaft, three-piece (digest) — 490:22-2
  - Edging tool for wings, Hicks (shop notes)—1136:22-4
  - Fiberglas-resin linings (digest) — 1064:21-4
  - Forging aluminum cylinder heads, Aird (digest)—192:22-1
  - Lightweight floors for, Fitzpatrick (digest)—188:21-1
  - Machining propeller blades (news)—1764:21-6
  - Pheonlic fibre in airplane parts, Stedman—1658:21-6
  - Plastics in, Hoeltzel (digest)—482:22-2
  - Plastics materials for, Houghton (digest)—1690:21-6
  - Production (blueprint)—1854:21-6
  - Rolled-on aluminum fins (digest)—1718:21-6
  - Sheet metal parts, designing, Mallett (digest)—476:21-2
  - Spraying aluminum on engines, Littel (shop notes)—1675: 21-6
  - Steel forgings for, control of, Pepin (digest)—816:21-3
  - Template reproduction, Reupsch and Green (digest)—1842:22-6
  - Wood in aircraft, use of, Hess (digest) —1058:21-4
- kaline cleaning, Duffy (engineering review)—129:21-1
- kyd resin finishes, Leffingwell and Lesser (digest)—470:21-2
- **LUMINUM AND ITS ALLOYS:**
  - Arc welding pure, Keating (digest)—1836: 22-6
  - Aspects of, Patterson (digest) — 790:22-3
  - Bonded to steel or cast iron, Whitfield and Sheshunoff—1090: 22-4
  - Box cars (digest)—1697:21-6
  - Brake drums (blueprints)—906:21-3
  - Bronze:
    - Die castings, mold-design for, Lockyer (digest)—824:22-3
    - Welding with, Norton (digest) — 1102:21-4
  - Carbon arc welding of, speeds fabrication, Conley—1423:22-5
  - Chromium-plated (blueprints)—640:22-2
  - Cladding, Seemann and Dudek (digest) —150:22-1
  - Clothing (blueprints)—906:21-3
  - Coated steel:
    - Corrosion resistance of (digest)—456:21-2
    - Hayes (engineering review)—88:21-1
  - Copper plating on (news)—836:21-3
  - Corrosion:
    - Behavior, Reschke (digest)—1798:22-6
    - Inhibiting coating for (news) — 1920:22-6
  - Creep properties, Adenstedt (digest)—766:21-3
  - Cylinder heads, forging, Aird (digest) —192:22-1
  - Delay quench of, Douglas (digest)—854:22-3
  - Dies for, casting resins as, Spencer (shop notes)—777:22-3
  - Fins, rolled-on (digest)—1718:21-6
  - Fluxing molter, with dry nitrogen, Hulme—1435:22-5
  - For lightweight construction, Hill and Fritzlen—700:21-3
  - Forging, large strong (news)—1556:22-5
  - Impurities in, Cook and Chadwick (digest)—168:21-1
  - In postwar buildings, West and Pike (digest)—458:21-2
  - Jet quench for (digest)—532:22-2
  - New alloy (news)—562:21-2
  - Overaging, effect of (digest)—1200:22-4
  - Painting, Wray (digest)—1080:21-4
  - Plating on, process for (news)—546:21-2
  - Powders (blueprints)—1854:21-6
  - Power lines (blueprints)—612:21-2
  - Pre-cleaner and deoxidizer (news)—1556:22-5
  - Rivet wire, testing (digest)—824:21-3
  - Rotors, pressure-casting (news) — 1552:22-5
  - Scrap, jigs and fixtures from, Shannon (shop notes)—1134:22-4
  - Sheet stock, priming, Ashmead (digest) —500:21-2
  - Silicon alloys, high, Allen (digest)—1800:22-6
  - Snow cruiser (digest)—488:22-2
  - Spraying, on aircraft engines, Littel (shop notes)—1675:21-6
  - Steel and, partners (blueprints) — 1326:22-4
  - Uses for (blueprints)—960:22-3
  - Wheels, centrifugal casting, Northcott and Lee (digest)—494:22-2
  - Wood (blueprints)—318:22-1
  - Wrought, Edwards (engineering review) —91:21-1
  - Zinc alloys, brittleness of, Chaudron, Herenguel and Lacombe (digest)—146:22-1
- Ammonia:
  - Dissociated, effective use of, Snell—727:22-3
  - For processing metals, Woodward and Quinn—418:22-2
- Anion exchange, metal recovery by, Sussman (digest)—512:21-2
- Annealing:
  - Atmospheres for, Peck—85:22-1
  - Compound, dry drawing and (news)—844:21-3
  - Gaseous, Whiteheart malleable, Robiette (digest)—1528:22-5
  - Induction heating for, Cable (digest)—196:21-1
  - Malleable iron, Rehder (digest) — 850:22-3
  - Stainless steel:
    - Carpenter (shop notes)—1789:22-6
    - In glass baths (blueprints)—640:22-2
  - Sub-critical, Howe (digest)—1504:22-5
- Anode rod, new adjustable (news)—550:21-2
- **ANODIZING:**
  - Black, copper and brass, McLean and Young (digest)—842:22-3
  - Decorative, Taylor (digest)—508:21-2
  - Murlless (engineering review)—131:21-1
- Antimony-bearing solder (blueprints)—960:22-3
- Armament, see Ordnance and armament
- Associations, briefs on (news)—270:21-1; 570:21-2; 858:21-3; 1164:21-4; 1480:21-5; 1798:21-6; 246:22-1; 616:22-2; 902:22-3; 1280: 22-4; 1594:22-5; 1940:22-6.
- Atmospheres:
  - Controlled, Koebel (engineering review) —122:21-1
  - For annealing metals, Peck—85:22-1
  - Prepared, for heat treating (digest)—1104:21-4
- Atomic bomb:
  - As an engineering achievement (editorial)—1047:22-4.
  - Cast iron vs. (production frontier)—966:22-4
  - Defense for (production frontiers)—1329:22-5
  - Materials for producing, Rose—1054:22-4
  - Share the? (production frontiers)—964:22-4
- Atomic energy control: A problem for engineers (editorial)—1719:22-6
- Atomic fission—Armageddon or Utopia? Peters (editorial)—391:22-2
- Atomic power, thoughts on (production frontiers)—964:22-4
- Austempering, salt furnace for (news) —886:22-3
- Autoclave, 1-gal. (news)—1452:21-5
- **AUTOMATIVE PRODUCTS:**
  - Aluminum brake drums (blueprints)—906:21-3
  - Bearing by powder metallurgy (news) —1551:22-5
  - Castings, repairing cracked, by metallizing. Plumeau (shop notes)—752:21-3
  - Civilian autos shaping up (production front)—324:22-2
  - Featherweight automobiles (blueprints) —1652:22-5
  - Ford's tri-alloy bearing. Westrate (di-

gest)—1072:21-4
  Injection carburetors (production front)—6:21-1
  Iron crankshafts, casting and machining. Bergdoll—994:21-4
  Light-metal doors (blueprints)—960:22-3
  Lightweight automobiles (blueprints)—318:22-1
  Motorcar materials (blueprints)—1534:21-5
  Post-war automobiles (blueprints)—906:21-3
  Post-war road transport, Pannell (digest)—176:21-1
  Power take-off (news)—1260:22-4
Babbitting methods, improved, Park (digest)—1838:22-6
Babbitts, lead base, Burpo (file facts)—1781:22-6
Band sawing:
  High velocity, Chamberland (digest)—1082: 21-4
  Skip tooth (news)—1136:21-4
  Stainless steel, McGraw and Shum (digest)—1710:21-6
Barrell finishing, Mitchell (engineering review)—130:21-1
"Beanie" caps (news)—558:21-2

BEARINGS:
  Anti-friction, maintenance (file facts)—747:21-3
  Auto, by powder metallurgy (news)—1551:22-5
  Cemented-carhide, Longwell (digest)—786:22-3
  Compound sleeve (digest)—1812:22-6
  Developments, Holligan (digest)—493:22-2
  Diesel-engine, Tichvinsky (digest)—164:22-1
  Ford's tri-alloy, Westrate (digest)—1072:21-4
  Fruit and anti-friction (production front)—313:21-2
  Iron, sintered, Heidebrock (digest)—1494:22-5
  Iron liners, sintered, Hinderbroek (digest)—1164:22-4
  Journal, relining lead alloy, Wofenden—81:22-1
  Materials and design, Darby (engineering review)—108:21-1
  Measuring balls for, Meiklejohn (digest)—1112:21-4
  Plastic, Heiderbrock and Zickel (digest)—1062:21-4
  Protecting, with air conditioning, Martinez (shop notes)—1675:21-6
  Silver (blueprints)—1854:21-6
    Etchells and Underwood (digest)—1490:22-5
  Tri-metal alloy (digest)—1684:21-6
  White metal alloys, Tabor (digest)—796:22-3
  Zinc-base metals, von Schwarz (digest) 1802:22-6
Bender, automatic, small (news)—556:21-2
Bending, power, of metals (digest)—1182:22-4
Beryllium copper:
  Heat treatment phenomena, Thomas (digest)—1198:22-4
  Removing impregnated oxides from, Slagle (shop notes)—1465:22-5
  Some processing characteristics, Slagle—731:22-3
Bismuth alloys, Trethaway (engineering review)—93:21-1
Blackplate vs. tinplate cans, Adams and Dickinson (digest)—1818:22-6
Blast cleaning, Potter (engineering review)—133:21-1
Blast furnaces:
  Hot blast stoves, Frost—174:22-1
  Practice, Sweetser (engineering review)—111:21-1
  Standardization of, Bulle (digest)—486:21-2
  Tuyeres, Fortune (digest)—792:21-3
Blasting, airless abrasive unit (news)—1450:21-5
Blocks, self-locking, forming with, Uhl (shop notes)—448:21-2
Blueprints—308:21-1; 612:21-2; 906:21-3; 1224:21-4; 1534:21-5; 1854:21-6; 318:22-1; 640:22-2; 960:22-3; 1326:22-4; 1652:22-5; 1966:22-6
Boilers, fusion-welded, Carse (digest)—796:21-3
Bolts:
  Cargo tie-down, heat treated, Heyn (shop notes)—1136:22-4
  Close tolerance, making (digest)—1828:22-6
Bonding, see Welding

BOOK REVIEWS:
  A. S. T. M. standards on copper and copper alloys—1210:22-4

  Shrinkage and gas effects in castings of non-ferrous metals and alloys, Baker—542:22-2
  Solidification of metals, Schwartz—1540:22-5
  Steel expansion for war, Hauck—1210:22-4
  Structural failures in welded ship construction—542:22-2
  Symposium on centrifugal casting—214:22-1
  Tentative hardenability bands—542:22-2
  Ternary phase diagrams—528:21-2
  Weldability standards for alternate aircraft steels—238:21-1
  Working principles of electric are wel ing—1438:21-5
Boring machine, special (news)—588:2
Boron:
  Bearing cylinder liners, Brekhin a Davydev (digest)—1498:22-5
  Carbide:
    (blueprints)—1854:21-6
    Hardest man-made material, Cady 1058:22-4
  In malleable iron, Tisdale (digest) 502:22-2
Brake drums, aluminum (blueprints) 906:21-3
Brazing, see Welding
Bridge decks, open-mesh steel (blu prints)—1534:21-5
Brittleness of aluminum-zinc alloy Chaudron, Herenguel and Lacom (digest)—146:22-1
Broaches, heat treating, Carpenter (sh notes)—462:22-2
Broaching, see Machining
Brushes:
  Carbon-brush problems, Savage (diges—1814:22-6
  Power (news)—544:21-2; 1912: 22-6
Brushing:
  Away potential fatigue failures, Ro land (shop notes)—750:21-3
  Power, Rowland (shop notes)—1466:2
Buffing, Crane (engineering review) 133:21-1
Building boom (blueprints)—1224:21-4
Cable sheaths, lead-zinc for, Pfender a Schulze (digest)—1484:22-5
Cans:
  (blueprints)—318:22-1
  Blackplate vs. Tinplate, Adams a Dickinson (digest)—1818:22-6

CARBIDES:
  Boron (blueprints)—1854:21-6
    Hardest man-made material, Cady 1058:22-4
  Cemented:
    Bearings, Longwell (digest)—786:22
    Metallography of, Shute (digest) 538:22-2
  Cutters, mounting mechanically, Kenn cott (digest)—836:22-3
  Cutting:
    Program (digest)—520:22-2
    Techniques (digest)—1192:22-4
  Die applications, Zapp (digest) 1162:22-4
  Dies, sintered (news)—1238:22-4
  Fingers used on gages, Curtis (sho notes)—750:21-3
  Forming dies, sintered (digest) 1522:22-5
  Lamination die (news)—1916:22-6
  Tools:
    Diamond hones on, Strauss (sho notes)—1364:21-5
    Hand honing, Lucht (digest) 1084:21-4
    Milling with, Burt (digest)—1510:22
    Tipped, cast iron base for, Power (shop notes)—1044:21-4
    Tipped, plastic coatings for, Goul (digest)—838:22-3
    Turning with, Granzow (digest) 1188:22-4
Carbon:
  Analysis via glass tube, Long (sho notes)—1136:22-4
  Arc welding of aluminum speeds fab rication, Conley—1423:22-5
  Brush problems, Savage (digest) 1814:22-6
  Flue for corrosive gases, Sigerson (sho notes)—448:21-2
  For mechanical and electrical parts, Vos burgh—721:22-3
  For switch gear, Hofmann and Weile (digest)—1486:22-5
  Hard chromium plating directly on Herwig—1751:22-6
Carbothermic process, magnesium by Stedman—102:22-1
Carburetors, injection (production front—6:21-1
Carburizing, Heath (engineering review—122:21-1
Cartels (production front)—312:21-2
Case-harened materials, properties, Gerts man and MacPherson (digest)—174:21-
Case hardening by megacycle inductio heating, Sherman (digest)—492:21-2

CAST IRON:
  Alloy:
    Guedras (digest)—472:22-2
    Kinsella (digest)—1144:22-4
  Aluminum bonded to, Whitfield an Sheshunoff—1090:22-4
  Atomic bomb vs. (production frontier—966:22-4
  Base for carbide tipped tools, Power (shop notes)—1044:21-4
  Die castings (digest)—1496:22-5
  Gray:
    (blueprints)—612:21-2
    Casting repair (file facts)—441:21-2
    Castings in metal molds, Englisc (digest)—198:21-1

  For high temperatures, Burgess and Barlow (digest)—474:22-2
  Lorig (engineering review)—88:21-1
Heat treated, Varick (digest)—468:22-2
High strength, Burpo (file facts)—1355:21-5
Impact test for, Everest, Grant and Morrogh (digest)—1204:22-4
In the chill mold, Englisch (digest)—1170:22-4
Inoculated high-duty, Francis (digest)—1074:21-4
Malleable, Lansing (engineering review)—89:21-1
Pearlitic malleable, Lindsay and Atherton (digest)—1826:22-6
Preparing, for silver brazing, Shoemaker (shop notes)—1364:21-5
Reinforced, Bertschinger (digest)—814:22-3
Welding (digest)—1196:22-4
Welding rod (news)—580:22-2
  As cores, Johnson (shop notes)—460:22-2
ast structures, heat treatment of, Angus (digest)—478:21-2
asting, see Foundry practice

ASTINGS:
Alloy, for heat and corrosion resistance (engineering review)—87:21-1
Bronze, porosity of, Baker, Child and Glaisher (digest)—200:21-1
Centrifugal, Gobeille (engineering review)—98:21-1
Copper alloy, porosity in, Strauss (digest)—1076:21-4
Die, see Die casting
Feeding of, Nisbet (digest)—500:22-2
Ferrous, improvements in, Vennerholm (digest)—1066:21-4
Filling holes and cracks in, Davis (shop notes)—154:21-1
Gray iron:
  Casting repair (file facts)—441:21-2
  In metal molds, Englisch (digest)—198:21-1
Iron:
  Check method for, Hendry (digest)—480:21-2
  Engineering properties of malleable, Burpo (file facts)—1667:21-6
  Strong, light, Albrecht—1631:21-6
Light-alloy, radiography of, Snushall (digest)—516:21-2
Machine-tool, Ritchie (digest)—172:22-1
Magnesium, making high-quality, Lorch—1652:21-6
Methods, Rose (file facts)—145:21-1
Permanent mold:
  Fahlman (engineering review),—97:21-1
  Sugar (materials and methods manual)—1015:21-4
Plaster mold:
  Barnard—1085:22-4
  Moore (engineering review)—99:21-1
Plastics, Thompson (engineering review)—103:21-1
Porous:
  Impregnation, Ridenour (shop notes)—780:22-3
  Impregnator for (news)—1222:22-4
  Sealant for (news)—1464:21-5
Precision:
  Centrifugal machine for (news)—553:22-2
  Merrick (engineering review)—99:21-1
Pressure ferrous castings, Jeter (digest)—788:21-3
Protective (news)—1156:21-4
Repairing cracked, by metallizing, Plumeau (shop notes)—752:21-3
Resins as dies for aluminum, Spencer shop notes)—777:22-3
Sand, Hindle (engineering review)-97:21-1
Sealing porous, Fuller—1746:22-6
Steel:
  (blueprints)—640:22-2
  By thermit reaction (news)—570:22-2
  Continuous production, Stedman—735:22-3
  Engineering properties, Burpo (file facts)—771:22-3
  Flame-gouging of, Blake—1428:22-5
  Heat treatment, Burpo (file facts)—1127: 22-4
  Side feeding of, Gray (digest)—482:21-2
  Visual inspection, Johnson (digest)—1206:22-4
ellulose esters, exposure resistance of, Lawton and Nason (digest)—774:21-3

  What of our future? (editorial)—713:22-3
Engines, applying porous chromium to, Fiske (shop notes)—780:22-3
Evaporator, self-descaling (shop notes)—752:21-3
Expositions, schedule of coming—270:21-1; 856:21-3; 1166:21-4; 1610:22-5; 1932:22-6
Exposure:
  Meter, photoelectric, for metallography, Brunner—416:22-2
  Resistance of cellulose esters, Lawton and Nason (digest)—774:21-3
Extruding large nickel alloy tubing—708:21-3
Extrusions, impact (blueprints)—318:22-1
Fabricating methods, parts and, from application standpoint, Peters (engineering review)—96:21-1
Fabrics:
  Attaching with screws, Miner (digest)—1071:21-4
  Developments, wartime, Sanders (digest)—770:21-3
Facing alloys, two hard (news)—1896:22-6
Fastening and riveting, Cady (engineering review)—128:21-1

FATIGUE:
  Failures, brushing away potential, Rowland (shop notes)—750:21-3
  Resistance, Peters (engineering review)—106:21-1
  Strength and surface hardening processes, Almen (digest)—469:21-2
  Strength of Diesel crankshafts, Lehr and Ruef (digest)—780:21-3
  Surface treatment for, Foppl (digest) 1844:22-6
  Testing, Foster and Seliger (digest)—814:21-3
  X-ray diffraction study, Barkow (digest)—1736:21-6
Feeding of castings, Nisbet (digest)—500:22-2
Feeds for automatics, special, Brosheer (digest)—1506:22-5
Felt:
  Bobs (news)—1144:21-4
  Gaskets, chromate-impreganted, Turner (shop notes)—448:21-2
  Industrial, Rose (file facts)—741:21-3
Ferroalloys used in steel making, Burpo (file facts)—455:22-2
Fiberboard, giant press for (news)—1146:21-4
Fiberglas-resin aircraft linings (digest) 1064:21-4
Filaments, woven plastics, Levine (digest)—158:22-1
File cleaner, improved (news)—1768:21-6
Films, anodic oxide, control methods for, Herenguel and Segond (digest)—1508:22-5

FINISHING:
  Alkyd resin finishes, Leffingwell and Lesser (digest)—470:21-2
  Barrel, Mitchell (engineering review)—130:21-1
  Die castings, small, Pierce (digest)—530:22-2
  Electroplating:
    Beryllium and tantalum (news)—1138:21-4
    Defects in, Zapffe and Faust (digest)—1108:21-4
    Lamb (engineering review)—132:21-1
  Finishes:
    Imperfections of grinding, Paine (shop notes)—1468:22-5
    Measurer of rougher surface (news)—562:22-2
    Organic, for magnesium, Close (digest)—1708:21-6
    Porcelain enamel, Meacham (digest)—168:22-1
    Surface (blueprints)—612:21-2
      Standards set (news)—1868:22-6
  Organic, Fulton (engineering review)—132:21-1
  Plastic, of metal products, Reves (digest)—488:21-2
  Plating:
    Anode rod, new adjustable (news)—550:21-2
    Brass, steel cartridge cases, Kronsbein and Smart (digest)—212:21-1
    Chromium, hard, directly on carbon and graphite, Herwig—1751:22-6
    Copper on aluminum (news)—836:21-3
    Counter current on zinc anodes, Hull (digest)—208:21-1
    Fine steel wire, Conolly and Rimbach (digest)—1720:21-6
    Glass tanks for pickling and, West—413:21-2
    Hard chrome, Bilfinger (digest)—834:22-3
    Machine, high-speed (news)—1152:21-4
    Nickel, high-speed, Pinner and Kinnaman (digest)—1726:21-6
    On aluminum, process for (news)—546:21-2
    Silver, of steel, Sprague (digest)—1734:21-6
    Speculum (blueprints)—640:22-2
      Uses, Ireland—1400:22-5
    Superimposed a. c. for, Birdsall (digest)—1730:21-6
    Three-metal process (news)—840:21-3
    "Watchdog" laboratory for, Sanders (shop notes)—752:21-3

  Pre-treating metals for finish, Close (digest)—1832:22-6
  Supersonics in metal, Pinsky (digest)—1176:22-4
  Ultra-fine surfaces on metals, Rose—70:22-1
  War finishes in Australia, Armstrong (digest)—1104:21-4
